US Nationals 15k/30k Results Report Showing Splits

This report showing splits for Monday's race will be improved as the day goes on, but I wanted to post the information sooner rather than later.

This split data was taken by **Gary Giberson** and **Ann Page**, so they are to be thanked by all. They both worked really hard and they generated exceptionally good data. Out of over a thousand data points, only one was missed. My apologies to Eben Sargent whose time for his 3rd trip up the hill is not accurate.

Also, my apologies to the women, because we were not able to take the split data during their race.

Ann took splits at the bottom of Hermod Hill (approximately 6 km into the lap), and Gary Took splits at the top of Hermod Hill (approximately 6.5 km into the lap).

So the time for each hill climb is shown in this report as Split 2, Split 4, Split 6, and Split 8.

Split 1, Split 3, Split 5, and Split 7 show the time for the rest of the lap.

As mentioned, the report will be generated again later today with more information.
